## Section 1: Properties of Quadratics

The simplest form a $\qquad$ relationship is $y=x$

| $\boldsymbol{x}$ | $\boldsymbol{y}$ | $\mathbf{1}^{\text {st }}$ Differences |
| :---: | :---: | :---: |
| -3 |  |  |
| -2 |  |  |
| -1 |  |  |
| 0 |  |  |
| 1 |  |  |
| 2 |  |  |
| 3 |  |  |

Notice that the column of $1^{\text {st }}$ finite differences is $\qquad$ for linear relationships.

The simplest form a $\qquad$ relationship is $y=x^{2}$

| $\boldsymbol{x}$ | $\boldsymbol{y}$ | $\mathbf{1}^{\text {st }}$ Differences | $\mathbf{2}^{\text {nd }}$ Differences |
| :---: | :--- | :--- | :--- |
| -3 |  |  |  |
| -2 |  |  |  |
| -1 |  |  |  |
| 0 |  |  |  |
| 1 |  |  |  |
| 2 |  |  |  |
| 3 |  |  |  |

Notice that the column of $2^{\text {nd }}$ column of finite differences is $\qquad$ for quadratic relationships.

## Properties of Quadratics

- The shape of the graph of a quadratic relation is called a $\qquad$
- A parabola has a maximum or minimum point called a $\qquad$
- If the parabola opens up, the vertex is a $\qquad$ point
- If the parabola opens down, the vertex is a $\qquad$ point
- Parabolas are symmetrical
- The vertical line that passes through the vertex is the $\qquad$

## Section 2: Quadratics in Standard Form

The standard form of a quadratic equation is

Example 1: For the function $y=x^{2}+2 x+1$, sketch a graph by completing the given table of values, then state the vertex and axis of symmetry.

| $\boldsymbol{x}$ | $\boldsymbol{y}$ |
| :---: | :---: |
| -4 |  |
| -3 |  |
| -2 |  |
| -1 |  |
| 0 |  |
| 1 |  |
| 2 |  |

Properties of Quadratics from the Standard Form Equation $\rightarrow y=a x^{2}+b x+c$

- If $a>0$, the parabola opens $\qquad$
- If $a<0$, the parabola opens $\qquad$
- The $\qquad$ is at $(0, c)$

Example 2: State the direction of opening and $y$-intercept of the given quadratic, then make a table of values and sketch the graph to verify.
a) $y=-3 x^{2}+2$
b) $y=2 x^{2}-8 x+3$

| $\boldsymbol{x}$ | $\boldsymbol{y}$ |
| :---: | :---: |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |

| $\boldsymbol{x}$ | $\boldsymbol{y}$ |
| :--- | :--- |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |
